

HANA WAEI

Full-Stack Developer | Computer Science Student

Alexandria, Egypt • hannahtag186@gmail.com

• GitHub: github.com/hxnx444 • Portfolio: hxnx444.github.io/Portfolio-website/

PROFESSIONAL SUMMARY

Detail-oriented Computer Science student and Front-End Developer with hands-on experience building production-grade web applications using React and Node.js. Focused on clean UI, accessible design, and writing maintainable, well-structured code. Proven ability to take end-to-end ownership of projects—from ideation and component architecture to final deployment—while thriving in feedback-driven environments.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Python, Java, PHP, SQL
- **Frameworks & Libraries:** React, Node.js, JavaFX
- **UI/UX & Design:** Figma, Adobe XD, Responsive Design, CSS Animations, UI/UX Fundamentals
- **Developer Tools:** Git, GitHub, Visual Studio Code, Chrome DevTools
- **Core Concepts:** Component Architecture, RESTful APIs, Object-Oriented Programming (OOP), Relational Databases

PROJECTS

Aura Vision | Full-Stack Productivity Web App *React, Node.js, CSS Animations*

- Built a full-stack productivity app by connecting interactive React components to a Node.js backend, implementing dynamic state management and a scalable component architecture.
- Reduced rendering overhead by structuring reusable components, improving overall maintainability and application performance.
- Applied CSS animations and responsive design principles to deliver a polished, highly accessible user experience.

Library Management System | Desktop Application *Java, JavaFX, SQLite/MySQL*

- Engineered a comprehensive desktop application with a robust OOP architecture to manage member registration, book tracking, and borrowing workflows for 500+ records.
- Streamlined the user interface and functionality by successfully resolving critical bugs in the 'return book' and 'view borrow list' features, and optimizing the user flow by removing redundant logout elements.

- Integrated a relational database for secure, persistent data handling with complex query support.

Personal Portfolio Website *HTML, CSS (Flexbox/Grid), JavaScript*

- Designed and deployed a highly responsive developer portfolio prioritizing clean UI, accessible spacing, and clear readability across all devices.
- Structured modular layouts using modern CSS Flexbox and Grid, implementing interactive elements to intuitively guide user flow.

Travel Quest | Responsive Travel Website *HTML, CSS, JavaScript*

- Built a multi-page, fully responsive travel website with custom navigation interactions and an optimized DOM structure.
- Ensured seamless performance and load efficiency across all screen sizes and mobile devices.

EDUCATION

Bachelor of Science in Computer Science (Expected Graduation: 2028), *Alexandria University, Faculty of Science*

- **Relevant Coursework:** Human-Computer Interaction (HCI), Data Structures & Algorithms, Advanced Programming, Computer Graphics, Web Development, System Programming, Theory of Computation, Discrete Structures, Object-Oriented Programming.
